

Jack Brown

Frontend developer with 2 years of C# experience building and maintaining user-focused applications using Unity and .NET compatible libraries. Proven ability to collaborate effectively within cross-functional teams, troubleshoot complex technical issues, and deliver clean, scalable, and maintainable code. Additional academic experience in C++, web development and Unreal Engine. A strong foundation in software development principles with a passion for creating interactive and immersive digital experiences.

Education

Sept 2015 - July 2019	BSc (Hons) Computer Games Programming <i>University of Gloucestershire, UK</i>
Sept 2008 - July 2010	A Level Qualifications in Physics, Psychology and Human Biology <i>Ribston Hall High School, Gloucestershire, UK</i>
Sept 2003 - July 2008	GCSE Qualifications, including Maths (A*), English(A, A) and Science (A, A) <i>Severn Vale School, Gloucestershire, UK</i>

Current Work Experience

June 2024 - June 2026	Junior Front End Developer <i>YVR Airport, Vancouver</i>
------------------------------	--

Working as part of the Innovation Team at YVR to work on a Digital Twin for airport operations. The Digital Twin is a virtual representation of the airport and surrounding area, enabling real-time monitoring of systems like air traffic, passenger movement and baggage handling. Developed using Unity, the application consumes and displays data, integrating sensors and live data to optimize operations and enhance the passenger experience. Responsibilities included:

- Implementing new features to further develop the Digital Twin using Unity.
- Effectively used Fork Git as a primary version control client, and leveraged Microsoft Azure to create pull requests and merge branches into the main project.
- Developed frontend features that consumed and displayed data from REST APIs.
- Identified tech debt, and implemented solutions to improve the stability and performance of the application.
- Created presentations and delivered them to customers, shareholders, management and colleagues to demonstrate new features worked on within the previous sprint on a bi-weekly cadence.
- Utilised tools such as Jira and Confluence to aid in the agile development process.
- Expanded knowledge of Unity and C# programming.

Previous Work Experience

Aug 2021 - Dec 2023	Bar Manager - <i>The Ox Pub, Vancouver</i>
Aug 2020 - July 2021	Bartender - <i>Mila Restaurant, Vancouver</i>
